

SoFi Social 50 ETF
Trading Symbol: SFYF
Listed on NYSE Arca, Inc.
Summary Prospectus
June 26, 2026
www.sofi.com/invest/etfs/sfyf/

Before you invest, you may want to review the SoFi Social 50 ETF (the “Fund”) statutory prospectus and statement of additional information, which contain more information about the Fund and its risks. The current statutory prospectus and statement of additional information dated June 26, 2026 are incorporated by reference into this Summary Prospectus. You can find the Fund’s statutory prospectus, statement of additional information, reports to shareholders, and other information about the Fund online at www.sofi.com/invest/etfs/sfyf/. You can also get this information at no cost by calling at (877) 358-0096 or by sending an e-mail request to ETFsupport@sofi.com.

Investment Objective

The SoFi Social 50 ETF (the “Fund”) seeks to track the performance, before fees and expenses, of the SoFi Social 50 Index (the “Index”).

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Annual Fund Operating Expenses⁽¹⁾ (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.29%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.29%

- ⁽¹⁾ The Fund’s investment adviser, Tidal Investments LLC (“Tidal” or the “Adviser”), a Tidal Financial Group company, will pay, or require a third party to pay, all expenses incurred by the Fund (except for advisory fees and sub-advisory fees, as the case may be) excluding interest charges on any borrowings, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the Investment Company Act of 1940 (the “1940 Act”), and litigation expenses, and other non-routine or extraordinary expenses (collectively, the “Excluded Expenses”).

Expense Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$30	\$93	\$163	\$368

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in total annual fund operating expenses or in the expense example above, affect the Fund’s performance. For the fiscal year ended February 28, 2026, the Fund’s portfolio turnover rate was 51% of the average value of its portfolio.

Principal Investment Strategies

The Fund uses a “passive management” (or indexing) approach to track the performance, before fees and expenses, of the Index. The Index follows a rules-based methodology (described generally below) that tracks the performance of a portfolio of the 50 most widely held U.S.-listed equity securities in self-directed brokerage accounts (the “SoFi Accounts”) of SoFi Securities, LLC, an affiliate of Social Finance, Inc. (“SoFi”), as determined using the rules-based methodology. The Index is owned and administered by Solactive AG (the “Index Provider”), which engaged SoFi to develop the rules set and related methodology used to determine the securities to be included in the Index. SoFi is not involved in the ongoing maintenance of the Index or any discretionary decisions relating to its application, and does not act in the capacity of an index provider. SoFi has licensed certain of its trademarks to the Index Provider for use in connection with the Index.

SoFi Social 50 Index

The Index is designed to reflect the 50 most widely held U.S.-listed equity securities in the SoFi Accounts as weighted by aggregate holdings within the SoFi Accounts. Securities eligible for inclusion in the Index must: (a) be U.S.-listed equity securities held in SoFi Accounts, and (b) have an average daily trading volume of at least \$10,000,000 during the preceding one-month and six-month periods (the “Eligible Universe”). The Index may include common stocks and equity interests in real estate investment trusts (“REITs”). ETFs and other investment companies are not eligible for the Index. Securities in the Eligible Universe are sorted based on (1) the number of SoFi Accounts that hold a particular security and (2) the total market value of the security held in the SoFi Accounts (the “Weighted Average Value”). Each security in the Eligible Universe is then ranked from highest to lowest based on its Weighted Average Value (e.g., the security with the highest Weighted Average Value is assigned rank 1). Subject to a “buffer rule” aimed at limiting Index turnover, securities ranked within the top 50 are included in the Index.

Each security in the Index is then weighted based on its Weighted Average Value in relation to that of the other Index components and is subject to certain individual security weight and sector concentration caps. For example, the weight of each individual Index component is capped at 10%, and securities representing investments in any particular industry sector are capped at 50%. The Index is rebalanced and reconstituted monthly.

As of June 1, 2026, the SoFi Accounts consisted of over 3.1 million separate self-directed brokerage accounts.

The Fund’s Investment Strategy

The Fund attempts to invest all, or substantially all, of its assets in the component securities that make up the Index. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of any collateral held from securities lending) will be invested in the component securities of the Index. The Adviser expects that, over time, the correlation between the Fund’s performance and that of the Index, before fees and expenses, will be 95% or better.

The Fund will generally use a “replication” strategy to achieve its investment objective, meaning it generally will invest in all of the component securities of the Index. However, the Fund may use a “representative sampling” strategy, meaning it may invest in a sample of the securities in the Index whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole, when the Adviser believes it is in the best interests of the Fund (e.g., when replicating the Index involves practical difficulties or substantial costs, an Index constituent becomes temporarily illiquid, unavailable, or less liquid, or as a result of legal restrictions or limitations that apply to the Fund but not to the Index).

The Fund generally may invest up to 20% of its total assets (exclusive of any collateral held from securities lending) in securities or other investments not included in the Index, but which the Adviser believes will help the Fund track the Index. For example, the Fund may invest in securities that are not components of the Index to reflect various corporate actions and other changes to the Index (such as reconstitutions, additions, and deletions).

To the extent the Index concentrates (i.e., holds more than 25% of its total assets in the securities of a particular industry or group of related industries), the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Investment Risks

The principal risks of investing in the Fund are summarized below. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return, and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the section in the Fund’s Prospectus titled “Additional Information About the Funds—Principal Risks of Investing in Each Fund.”

Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears.

Concentration Risk. The Fund’s investments will be concentrated in an industry or group of industries to the extent the Index is so concentrated. In such event, the value of Shares may rise and fall more than the value of shares that invest in securities of companies in a broader range of industries.

User Bias Risk. The securities that comprise the Index are selected by retail investors holding SoFi Accounts, who may not be professional investors, may have no financial expertise, and may not do any research on the companies in which they invest prior to investing. In some cases, investment decisions made may be influenced by non-quantitative factors, including, without limitation, cognitive and emotional biases, resulting in the inclusion of certain securities in the Index which may underperform the market generally and result in lower returns for the Fund.

Equity Market Risk. The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. Common stocks, such as those held by the Fund, are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.

General Market Risk. Economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in the general financial markets, a particular financial market, or other asset classes, due to a number of factors, including inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters or events, pandemic diseases, terrorism, regulatory events, and government controls.

Sector Risk. At times the Fund may increase the relative emphasis of its investments in a particular sector or group of industries. The prices of securities of issuers in a particular sector may be more susceptible to fluctuations due to changes in economic or business conditions, government regulations, availability of basic resources or supplies, or other events that affect that industry or sector more than securities of issuers in other industries and sectors. To the extent that the Fund increases the relative emphasis of its investments in a particular industry or sector, the value of Shares may fluctuate in response to events affecting that industry or sector.

- *Consumer Discretionary Sector Risk.* The Fund may emphasize its investments in companies in the consumer discretionary sector, and therefore the performance of the Fund could be negatively impacted by events affecting this sector. The success of consumer product manufacturers and retailers is tied closely to the performance of domestic and international economies, interest rates, exchange rates, competition, consumer confidence, changes in demographics and consumer preferences. Companies in the consumer discretionary sector depend heavily on disposable household income and consumer spending, and may be strongly affected by social trends and marketing campaigns. These companies may be subject to severe competition, which may have an adverse impact on their profitability.
- *Technology and Semiconductor Sector Risk.* The Fund may invest in companies in the technology and semiconductor sector, and therefore the performance of the Fund could be negatively impacted by events affecting this sector. Market or economic factors impacting technology companies and companies that rely heavily on technological advances could have a significant effect on the value of the Fund's investments. The value of stocks of technology companies and companies that rely heavily on technology is particularly vulnerable to rapid changes in technology product cycles, rapid product obsolescence, government regulation and competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Stocks of technology companies and companies that rely heavily on technology, especially those of smaller, less-seasoned companies, tend to be more volatile than the overall market. Technology companies are heavily dependent on patent and intellectual property rights, the loss or impairment of which may adversely affect profitability. The semiconductor sector is highly cyclical and periodically experiences significant economic downturns characterized by diminished product demand, resulting in production overcapacity and excess inventory, which can result in rapid erosion of product selling prices. The semiconductor sector has experienced significant downturns, often in connection with, or in anticipation of, maturing product cycles of both semiconductor companies' and their customers' products and the decline in general economic conditions.

Market Capitalization Risk.

- *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
- *Mid-Capitalization Investing.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large-capitalization stocks or the stock market as a whole.

Passive Investment Risk. The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to its Index.

REIT Risk. Through its investments in REITs, the Fund is subject to the risks of investing in the real estate market, including decreases in property revenues, increases in interest rates, increases in property taxes and operating expenses, legal and regulatory changes, a lack of credit or capital, defaults by borrowers or tenants, environmental problems and natural disasters.

REITs are subject to additional risks, including those related to adverse governmental actions; declines in property value and the real estate market; the potential failure to qualify for tax-free pass through of income; and exemption from registration as an investment company. REITs are dependent upon specialized management skills and may invest in relatively few properties, a small geographic area, or a small number of property types. As a result, investments in REITs may be volatile. To the extent the Fund invests in REITs concentrated in specific geographic areas or property types, the Fund may be subject to a greater loss as a result of adverse developments affecting such area or property types. REITs are pooled investment vehicles with their own fees and expenses and the Fund will indirectly bear a proportionate share of those fees and expenses.

Recent Market Events Risk. U.S. and international markets have experienced and may continue to experience significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including uncertainty regarding inflation and central banks' interest rate changes, the possibility of a national or global recession, trade tensions and tariffs, political events, armed conflict, war, and geopolitical conflict. These developments, as well as other events, could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets, despite efforts to address market disruptions.

ETF Risk.

- *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that are authorized to purchase and redeem Shares directly from the Fund (known as "Authorized Participants" or "APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
- *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.
- *Trading.* Although Shares are listed on a national securities exchange, such as NYSE Arca, Inc. (the "Exchange"), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares. Also, in stressed market conditions, the market for Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings. These adverse effect on liquidity for Shares, in turn, could lead to wider bid/ask spreads and differences between the market price of Shares and the underlying value of those Shares.

Index ETF Risk. The Fund's strategy is linked to an Index maintained by the Index Provider that exercises complete control over the Index. Neither the Adviser nor the Index Provider is able to guarantee the continuous availability or timeliness of the production of the Index. There is no assurance that the Index Provider, or any agents that act on its behalf, will compile the Index accurately, or that the Index will be determined, maintained, constructed, reconstituted, rebalanced, composed, calculated or disseminated accurately. The Adviser relies upon the Index Provider and its agents to compile, determine, maintain, construct, reconstitute, rebalance, compose, calculate (or arrange for an agent to calculate), and disseminate the Index accurately. The Index Provider may delay or add a rebalance date, which may adversely impact the performance of the Fund and its correlation to the Index. In addition, there is no guarantee that the methodology used by the Index Provider to identify constituents for the Index will achieve its intended result or positive performance. The Index may not reflect all companies meeting the Index's eligibility criteria if certain characteristics of a company are not known at

the time the Index is composed or reconstituted. The calculation and dissemination of the Index values may be delayed if the information technology or other facilities of the Index Provider, calculation agent, data providers and/or relevant stock exchange malfunction for any reason. A significant delay may cause trading in shares of the Fund to be suspended. Errors in Index data, computation and/or the construction in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index Provider, calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. Any losses or costs associated with errors made by the Index Provider or its agents generally will be borne by the Fund and its shareholders.

Third Party Data Risk. The composition of the Index, and consequently the Fund’s portfolio, is heavily dependent on information and data calculated and published by an independent third party calculation agent (“Third Party Data”). When Third Party Data proves to be incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities from the Index that would have been excluded or included had the Third Party Data been correct and complete. If the composition of the Index reflects such errors, the Fund’s portfolio can also be expected to reflect the errors.

Tracking Error Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index. The use of sampling techniques may affect the Fund’s ability to achieve close correlation with its Index. The Fund may use a representative sampling strategy to achieve its investment objective, if the Adviser believes it is in the best interests of the Fund, which generally can be expected to produce a greater non-correlation risk.

Performance

The following performance information provides some indication of the risks of investing in the Fund by showing changes in the Fund’s performance over time. The bar chart shows the annual returns for the Fund from year to year. The table illustrates how the Fund’s average annual total returns for the 1-year, 5-year and since inception periods compare with those of the Index and a broad measure of market performance. The Fund’s past performance, before and after taxes, does not necessarily indicate how it will perform in the future.

On June 30, 2020, the Fund’s investment objective and principal investment strategies were substantially revised; therefore, the performance and average annual total returns for periods prior to that date were achieved under the Fund’s prior investment objective and principal investment strategies and would have differed if the Fund’s current investment objective and principal investment strategies had been in effect during those periods. Updated performance information is available on the Fund’s website at www.sofi.com/invest/etfs/sfyf.

The Fund’s calendar year-to-date return as of March 31, 2026 was -8.54%.

During the period of time shown in the bar chart, the Fund's highest quarterly return was 33.66% for the quarter ended June 30, 2021 and the lowest quarterly return was -31.01% for the quarter ended June 30, 2022.

**Average Annual Total Returns
For the Periods Ended December 31, 2025**

	1 Year	5 Year	Since Inception (May 7, 2019)
Return Before Taxes	28.87%	15.89%	17.59%
Return After Taxes on Distributions	29.75%	15.61%	17.39%
Return After Taxes on Distributions and Sale of Fund Shares	17.75%	12.71%	14.46%
SoFi Social 50 Index			
(reflects no deduction for fees, expenses, or taxes)	30.18%	16.34%	17.98%
S&P 500® Total Return Index			
(reflects no deduction for fees, expenses, or taxes)	17.88%	14.42%	15.69%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates during the period covered by the table above and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Shares through tax-deferred arrangements such as an individual retirement account ("IRA") or other tax-advantaged accounts.

Management

Investment Adviser: Tidal Investments LLC, a Tidal Financial Group company, serves as investment adviser to the Fund.

Qiao Duan, CFA, Vice President of Portfolio Management & Trading for the Adviser, has been a portfolio manager of the Fund since 2026.

Andy Hicks, Senior Vice President of Trading for the Adviser, has been a portfolio manager of the Fund since 2026.

CFA® is a registered trademark owned by the CFA Institute.

Purchase and Sale of Shares

The Fund issues and redeems Shares at NAV only in large blocks known as "Creation Units," which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the "Deposit Securities") and/or a designated amount of U.S. cash.

Shares are listed on a national securities exchange, such as the Exchange, and individual Shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the "bid" price) and the lowest price a seller is willing to accept for Shares (the "ask" price) when buying or selling Shares in the secondary market. This difference in bid and ask prices is often referred to as the "bid-ask spread."

Recent information regarding the Fund's NAV, market price, how often Shares traded on the Exchange at a premium or discount, and bid-ask spreads can be found on the Fund's website at www.sofi.com/invest/etfs/sfyf.

Tax Information

Fund distributions are generally taxable to shareholders as ordinary income, qualified dividend income, or capital gains (or a combination), unless an investment is in an IRA or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as marketing, educational training, or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.
