Fund Description

The SoFi Select 500 ETF seeks to track the performance, before fees and expenses, of the Solactive SoFi US 500 Growth Index. The SoFi Select 500 ETF seeks to provide exposure to the 500 largest publicly-traded U.S. companies as measured by market capitalization.

- **Diversified** – Help manage risk by investing in 500 of the largest U.S. companies.
- **Growth-focused** – SFY uses a composite growth score to adjust companies' weightings in the ETF. The score takes into account sales growth, revenue growth, and forward-looking revenue estimates. Companies with stronger growth characteristics receive a higher weight.
- **Designed with investors in mind** – SoFi ETFs target a higher risk-return profile, suitable for long-term investors who are both beginning their investment journeys and well on their way.

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. For the most recent month-end performance, please visit the Fund's website at <http://sofi.com/invest/etfs>. The market price is the final price at which a security is traded on a given trading day. Net Asset Value (NAV) is value per share on a specific date or time. Returns less than one year are cumulative.

Before investing you should carefully consider the Fund's investment objectives, risks, charges and expenses. This and other information is in the prospectus. A prospectus may be obtained by visiting sofi.com/invest/etfs. Please read the prospectus carefully before you invest.

Investors buy and sell ETF shares through a brokerage account or an investment advisor. Like ordinary stocks, brokerage commissions, and/or transaction costs or services fees may apply. Please consult your broker or financial advisor for their fee schedule.

There is no guarantee that the Fund's investment strategy will be successful. Investments in REITs involve unique risks. Securities in the real estate sector are subject to the risk that the value of their underlying real estate may go down. Shares may trade at a premium or discount to their NAV in the secondary market, and a fund's holdings and returns may deviate from those of its index.

These variations may be greater when markets are volatile or subject to unusual conditions. A high portfolio turnover rate increases transaction costs, which may increase the Fund's expenses. The Fund is new and has a limited operating history. The fund is passively managed and attempts to mirror the composition and performance of the Solactive SoFi US 500 Growth Index. This index tracks the performance of 500 of the largest U.S.-listed companies weighted based on a proprietary mix of their market capitalization and fundamental factors. It is not possible to invest directly in an index. The Fund's returns may not match due to expenses incurred by the Fund or lack of precise correlation with the index. You can lose money on your investment in the Fund.

Diversification does not ensure profit or protect against loss in declining markets.

SoFi ETFs are distributed by Foreside Fund Services, LLC.
